## Welcome Back, Anteaters!

UCI Transportation and Distribution Services is happy to welcome faculty, staff, and students back to campus for the 2022-2023 academic year. With the start of the fall quarter, motorists are encouraged to arrive early, as parking areas may become impacted during peak times. Please also review the information on [parking.uci.edu](http://parking.uci.edu) and stay up to date on our cost-saving modes of sustainable transportation.

## MUTUAL RESPECT FOR ALL ANTEATERS

## SUSTAINABLE TRANSPORTATION

### Work Reimagined Resources

UCI Transportation's resources and services have assisted our campus and the Work Reimagined initiative to support flexible work schedules. Eligible employees who commute to the UCI Main Campus for three days per week or less may cover their infrequent parking costs through our Sustainable Transportation (ST) Membership program. Refer to our [Work Reimagined resources](#) to learn how your transportation needs are supported.

### Be Visible While Biking at Night

With daylight savings ending soon and the sun setting earlier, we encourage cyclists to be as visible as possible when riding in low-light conditions. Before going on the road at night, make sure that your bike is equipped with lights and a red rear reflector, as well as reflectors on your pedals and wheel sides. Be sure to also wear high-visibility clothing so that you are noticeable to other road users. To promote cyclist and pedestrian safety on campus, UCI will be hosting various bike events this Fall. Look out for updates on [bike.uci.edu](http://bike.uci.edu).

### Carshare Services for Department use

We understand that employees working in UCI Research Park often conduct business on the main campus and therefore require reliable transportation. In partnership with ZEV-NET, our Fleet Services is preparing to launch a carshare program for departments without a fleet or looking to eliminate the cost of maintaining their department vehicles. We will be reaching out to department administrators with more information as we finalize this pilot program.

## TRAFFIC MANAGEMENT

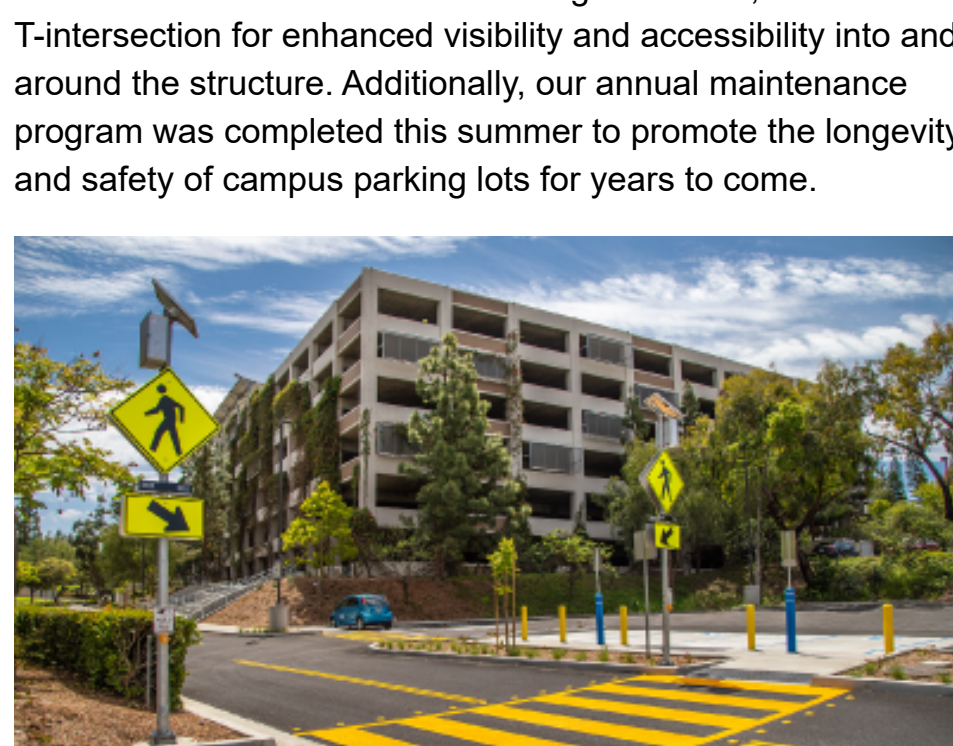

### Traffic Systems Research Project

As part of the \$6M grant, awarded to UCI by the Department of Energy, UCI Transportation and Distribution Services is partnering with the HORIBA Institute for Mobility and Connectivity2 and the Institute for Transportation Studies to establish a public road network platform. Artificial intelligence technology will be paired with lidar sensors at campus traffic signals in order to address potential safety challenges under any road conditions. For more details, visit [apep.uci.edu](http://apep.uci.edu).

## CURRENT PROJECTS

### Pedestrian Accessibility Improvements

Anteater Parking Structure's pedestrian improvements have concluded to provide a new ramp and staircase, two additional crosswalks with connecting sidewalks, and a T-intersection for enhanced visibility and accessibility into and around the structure. Additionally, our annual maintenance program was completed this summer to promote the longevity and safety of campus parking lots for years to come.

### New Parking Structure Coming Spring 2023

UCI will soon open its [fifth parking structure](#) to support the expansion of the College of Health Sciences. Located at the intersection of Theory and California Avenue, this project will create 2043 new parking stalls for our campus employees, students, and visitors. Construction continues to progress smoothly towards the expected completion date in March 2023.

## PARKING OPERATIONS

### Self-Manage your myCommute Products

For your convenience, all users may now remove old license plates or cancel their parking permits directly through [myCommute](#). Seamless permit management is now improved for both faculty and staff who wish to sign up for carpool permits and students who need to trade their zone permits. These improvements are part of our ongoing evaluation for streamlined services and the overall positive user experience.

## MAPPING

### Emergency Resources on Interactive Map

Use our map to quickly refer to campus [emergency resources](#), including your building's or housing community's evacuation zone and closest assembly area. We encourage you to take some time and review your available safety resources to ensure that you are prepared in the event of an emergency. These resources were added in partnership with UCI Emergency Management, in support of National Preparedness Month.

## GUEST AND EVENT SERVICES

### Reserve Charter Services for your Event

Our Guest and Event Services team is here to help you plan your event! Whether you're organizing a campus tour or making your way to an off-campus event, we provide various transportation modes to best fit your needs. ADA-accessible cart and shuttle options are also available for reservation. Visit our [website](#) for additional details.

## FLEET

### Green Fleet Award Winners

This year, UCI's Transportation and Distribution Services ranked #10 in the Green Fleet Awards and was recognized by the National Association of Fleet Administrators (NAFA) as the only university within the top ten greenest fleets in North America. NAFA evaluates government and commercial fleet organizations to acknowledge groundbreaking and ingenious green initiatives. We are honored to uphold this ranking as we continue to advance our University's efforts in sustainability.
