

Lot 86 Construction Project

EXPECTED COMPLETION WINTER 2026

ABOUT THIS PROJECT

UCI Transportation, in partnership with the Gavin Herbert Eye Institute (GHEI), is developing a new patient-dedicated parking lot near the Health Sciences Parking Structure to support the University's growth and the continued development of the College of Health Sciences (COHS).

By adding 56 new parking stalls, 52 designated for patients and 4 compliant with ADA requirements, the project will significantly improve access to GHEI. The expansion also includes access to walking routes to the nearest crosswalk, providing a direct and secure path from the lot to the clinic.

These improvements will improve patient parking availability and support efficient access to the clinic.

PROJECT HIGHLIGHTS

- ➔ Supports GHEI clinic patients
- ➔ 56 parking stalls
- ➔ 52 stalls dedicated to patient parking
- ➔ 4 ADA parking stalls added with accessible crosswalk to GHEI
